

Bring your z/OS mainframe environment into your SIEM infrastructure and complete your compliance requirements.

Gaining a unified security viewpoint has been a huge problem for organisations with z/OS Mainframes. Now, using the **CorreLog Agent for z/OS** organisations can monitor their enterprise IT security from a unified viewpoint.

CorreLog Agent for z/OS integrates with any RFC 3164-compliant Syslog message processor or with **CorreLog Correlation Security Server** to correlate events from z/OS SMF, RACF®, CA-ACF 2™ and other key sources of security information.

Bring these events together with other events occurring in the wider infrastructure, will enable security and compliance professionals to completely monitor, control and report on critical security events occurring in your organisation.

Installing CorreLog Agent for z/OS in your z/OS mainframe environment will bring these benefits:-

- ✓ Investment protection. Compatible with all of your existing software. Freedom of choice: select CorreLog or any other Syslog console
- ✓ Complements your existing mainframe security software
- ✓ Get the data you need without unnecessary clutter
- ✓ Flexibility and investment protection
- ✓ Know who is accessing your system and when. Required for FISMA, PCI DSS, HIPAA, NERC and Sarbanes-Oxley compliance
- ✓ Know what's working and what's not working in real time in your z/OS production
- ✓ Know who accessed what data and when. Necessary for FISMA, PCI DSS, HIPAA, NERC and Sarbanes-Oxley compliance
- ✓ FTP is considered by many to be the number one mainframe security exposure. Be alerted to suspicious FTP events in real time
- ✓ In the event of an unauthorized access pinpoint the exact source of the threat in real time
- ✓ Thrifty use of mainframe resources. Does not contribute to escalating software costs
- ✓ Installs quickly, your up, running and protected in no time
- ✓ No matter what your data volume CorreLog Agent for z/OS will keep up
- ✓ Correlate related security events from mainframe and Windows®, Linux and UNIX® sources
- ✓ No training time, no down time

CorreLog Agent for z/OS features:-

- ✓ Standards compliant. Creates RFC 3164-compliant Syslog messages that work with any standards-based SIEM or Syslog collection software
- ✓ Collects events from mainframe security subsystems including RACF®
- ✓ Extensive yet straightforward user customization. Decide which events and fields you want to see.
- ✓ Works with CorreLog's unique correlation engine or any industry-standard Syslog console
- ✓ Collects TSO logons and logoffs
- ✓ Collects z/OS job and started task terminations including ABENDs
- ✓ Collects audit events from DB2
- ✓ Audits the use of FTP
- ✓ Collects login, telnet and other events from TCP/IP
- ✓ Uses only a few seconds of CPU time per day
- ✓ Installs in less than half a day
- ✓ Capacity of hundreds of thousands of Syslog messages per day
- ✓ Compatible with CorreLog's powerful correlation engine
- ✓ No impact on existing operations.

About CorreLog Inc

CorreLog, Inc. delivers security information and event management (SIEM) combined with deep correlation functions. CorreLog is real-time, SIEM software that automatically identifies and responds to network attacks, suspicious behaviour and policy violations. CorreLog collects, indexes and correlates user activity and event data to pinpoint security threats, allowing organizations to respond quickly to compliance violations, policy breaches, cyber attacks and insider threats. CorreLog provides auditing and forensic capabilities for organizations concerned with meeting SIEM requirements set forth by PCI/DSS, HIPAA, SOX, FISMA, GLBA, NCUA, and others. Maximize the efficiency of existing compliance tools through CorreLog's investigative prowess and detailed, automated compliance reporting. CorreLog markets its solutions directly and through partners. Visit www.correlog.com for more information.
